REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The primary reason for allowance is that the prior art of record does not disclose or suggest a process for treatment of a feedstock comprising diene compounds and primary butadiene as well as acetylene compounds in minor proportion wherein a portion of a stream that is enriched with acetylene compounds is drawn off laterally in the distillation column and passed to a hydrogenation zone, which is outside the distillation column, wherein the hydrogenation effluent is recycled above the draw-off level of the column in the rectification zone and the draw-off level and recycle level are in communication with the same hydrogenation zone so as to create an internal reflux in the distillation column as called for in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
